# Annual

# Fly Fishing School

*Fly Fishing* is simply recreation for some people and for others it's a life-long learning adventure. Regardless of interest level, everyone starts out needing to know the fundamentals of the sport. The basic topics include; equipment, fish and insect life-cycles, where to fish, knots, and casting.

This one day school will provide basic information in each of these areas. You'll have a chance to learn from some very experienced instructors who are willing to share what they've learned. It's also a great chance to strike up new friendships with people who share a common goal; to get started in Fly Fishing.

Location:  
Beautiful Onanda Park  
on Canandaigua Lake  
Building #4, Crouch Hall  
West Lake Road
